

A BEGINNER'S GUIDE TO DRUPAL 10

A CMS upgrade or migration is the most effective way to boost the performance of your applications and websites. Now that Drupal 7 and 9 are nearing the end of their lives, learn why you should plan on moving to Drupal 10.

WHAT'S NEW IN DRUPAL 10

Updated third-party components

The update of CK Editor, PHP, Composer, Symfony, JQuery

Easier website upgrades

The new version includes improved support for upgrading from previous versions of Drupal, and it also includes a number of tools and features that make it easier to manage and perform upgrades.

Project Browser

Project Browser is a new module that provides a centralized interface for managing and discovering Drupal projects, such as modules and themes.

+54%

PHP 8 and Symfony 5 or 6 (replacing Symfony 4) under the hood are required to keep the system secure.

Drupal 10

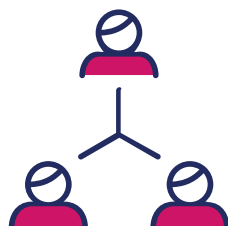

Automatic Updates

Automatic updates is a feature that enables the automatic installation of updates for Drupal core, modules and themes.

Decoupled Menus

Decoupled Menus is a new feature in Drupal 10 that allows for the separation of the menu system from the website's frontend.

New Default Front-end Theme

In Drupal 10, the default front-end theme is called Olivero. Olivero is a fully responsive theme that is designed to provide a clean and modern look for websites.

PROGRESSIVE WEB APP (PWA)

Allow your website to never show an "offline" message, respond quickly to user interactions, and appear like a native app on the homescreen.

WHAT DO YOU GET WHEN YOU MIGRATE TO DRUPAL 10?

DRUPAL 10 THE NEW CMS SAVIOR

Symfony 4, PHP7 and CKEditor 4 have reached their expiration date which makes websites running D9 vulnerable. D10 is here to save the day.

Take this opportunity to migrate and upgrade While there is still some time left.

EXCEPTIONAL EDITORIAL EXPERIENCE

Drupal 10 offers an exceptional editorial experience for content creators and editors.

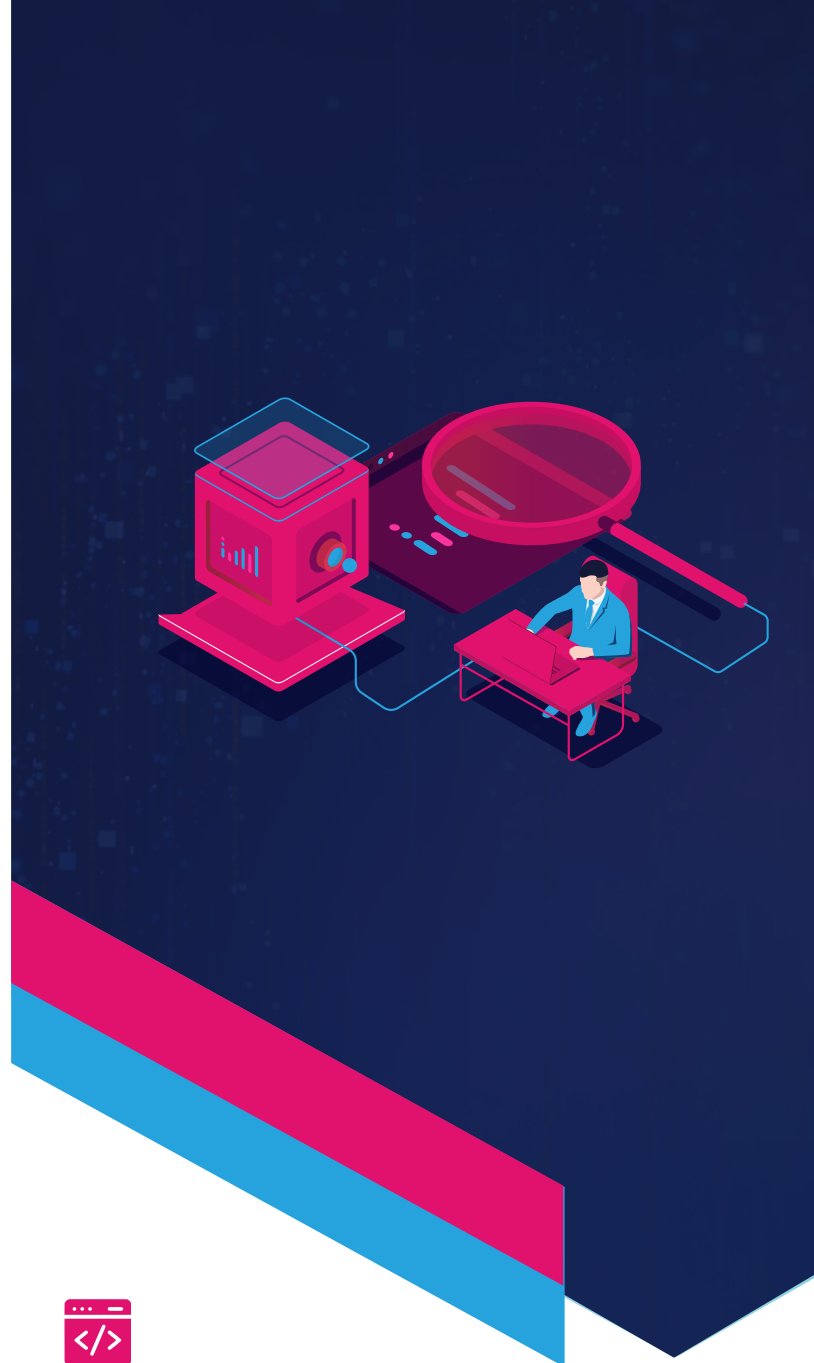

CLEAN CODEBASE & ENHANCED SECURITY

Drupal 10 has a cleaner and more modern codebase, which makes it easier to maintain and develop new features.

EASY CUSTOMIZATIONS WITH DECOUPLED MENUS

Drupal 10 includes a new feature called Decoupled Menus, which allows for easy customizations of the menu system.

INTERESTING FEATURES OF DRUPAL 10

IMPROVED SECURITY

Drupal 10 includes several security improvements such as support for the latest version of PHP and improved password hashing algorithms.

BETTER SUPPORT FOR MODERN TECHNOLOGIES

Drupal 10 has improved support for modern technologies such as React, GraphQL and Twig.

IMPROVED CONTENT EDITING

Drupal 10 has improved content editing features such as improved inline editing, improved block layout, and improved support for responsive design.

SYMFONY 4.4

Drupal 10 is based on Symfony 4.4, which provides improved performance, better scalability and new features such as improved dependency injection, improved security and improved support for web services.

RUN YOUR DRUPAL 10 UPGRADE IN THREE SIMPLE STEPS

IF YOU'RE ON DRUPAL 7:

Re-platform to D9 start now

IF YOU'RE ON DRUPAL 8:

Migrate without major overhaul

IF YOU'RE ON DRUPAL 9:

Update custom codes

MEDIA LIBRARY

Drupal 10 includes a new Media Library that allows users to easily manage, view, and reuse media assets. It also includes support for videos, audio, and other multimedia formats.

CONTENT MODERATION

Drupal 10 has improved content moderation features that make it easier for administrators to review, approve, and manage content on their site.

DRUPAL 10 READINESS INITIATIVE CHECK BY LN WEBWORKS

Being aware of the readiness of your website and its current ability to be ‘future-ready’ makes perfect business sense. A D10 Readiness check is imperative as CMSes constantly evolve in order to keep up with newer systems. That's precisely Where LN Webworks is ready to serve you with migration services.

Review

LN WEBWORKS'S DRUPAL EVALUATION FRAMEWORK

LN Webworks's Evaluation Framework is built to consistently perform Drupal Health checks to assess the readiness of websites. We make sure that the evaluation is thorough by adhering to the strict standards established by our framework. This is the way our system is carried out.

1 Preliminary Checks

The Drupal specialists at LN Webworks will conduct preliminary tests to assess your website's general health and capabilities.

2 Website Audit

An audit of your website's contributed modules will help us connect more with your site. Contributed modules define a variety of Drupal 7 and 9 content types, therefore examining these and then installing the same modules in Drupal 10 is our goal.

3 Custom Code Analysis

Examining checking your Drupal code against recommended code guidelines as well as best practice is vital to the process. Custom inspections of code allow us to determine what we can expect from revisions and also provide an estimate for the process of migration better.

4 Security Review

A security audit is an integral component of the assessment process. Automated testing to make sure that your site is safe against outside threats allows us to assess the Drupal 10 security readiness.

Custom Code Analysis

Security Review

5 Report Analysis

Based on the tests which are conducted and the readiness evaluation We provide the Performance Analysis Report that mentions the results and analyses on the risk category your website is in: Medium, High or Low.

6 Drupal 10 Assessment

Analyzing which modules are accessible on Drupal 10 and which modules have to be modified will allow you to comprehend the process of migration.

LN Webworks's Drupal experts analyze interference and create an end-to-end Drupal migration plan that starts with Drupal 10 readiness for your site. Since the goal is to upgrade to the newer version of Drupal, analytical planning lays the groundwork for the migration process.

We can help you get started on your
Drupal 10 migration journey today
